

ELECTRICAL SAFETY HAND PROTECTION ELECTRICAL INSULATING GLOVES

PRODUCT DESCRIPTION

Electrical Insulating Gloves offer protection against wide range of electric voltages (500 to 36000 Volts).

Electrical Insulating Gloves are made from natural latex formulation which offers high Di-electric properties which provides protection in many electrical applications.

Electrical Insulating glove design is best suited to be used with outer leather gloves which enhances protection against cutting or tearing.

FEATURES

- Ergonomic shape makes it easy for donning and doffing
- Natural Latex formulation providing high Di-electric properties for protection against electric applications
- Compatible with outer leather gloves for enhanced protection
- Economical offering with enhanced protection
- Available in multiple sizes and lengths

APPLICATIONS

- Industries with High Voltage electricity applications

PACKAGING DETAILS

- Each pair comes in an individual pouch with clear usage instructions
- 50 pairs packaged in one retail counter friendly carton box.

TESTING AND CERTIFICATION

- Complies to the requirement of EN 60903

TECHNICAL DETAILS

- Material:- Natural Latex Formulation
- Lining:- Non Flocked
- Usage:- Defining Voltage of use is necessary before selecting required Class(00 to 4) gloves. Prior inspection is important such as air inflation to check air leaks before using the gloves, don't wear gloves older than 1 year from date of manufacturing without prior testing.
- Storage:- Gloves must be stored at ambient Temperature (10-21°C) in original Bag away from direct sunlight, Ozone or Heat.

CATEGORY	RESISTANCE TO
A	Acid
H	Oil
Z	Ozone
R	Acid, Oil, Ozone
C	Extreme Low Temperature
